

INSTALLATION INSTRUCTIONS

Part Number: KA-2409XD

This filter fits: SEE CATALOG FOR CURRENT APPLICATIONS

Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter can last many seasons. This filter can be used in a stock machine, with no modifications required. If any engine modifications have been made tuning/jetting adjustments may be required. There are special installation instructions, so please follow the procedures outlined below to ensure the K&N® air filter seals properly.

If you need any assistance please call 1-800-858-3333 to speak with a representative in our Customer Service Center before returning the product.

INSTALLATION:

- 1) Remove air box lid/snorkel from air box
- 2) Remove your stock air filter from the air box. The stock air filter and filter cage will no longer be used with your new K&N® XStream® series motocross filter.
- 3) Clean all sealing surfaces in the air box including any necessary areas inside the air-boot ensuring you start as clean as possible.
- 4) Remove the XStream® top from the base of your XStream® series motocross filter.
- 5) Install filter into the air box. Note: You will need to squeeze filter to fit into the opening of the air box (Fig. 1 & 2)
 - a. Use caution when installing the air filter as damage can occur to the pleats on sharp edges.
 - b. Check the filter's alignment by looking and/or feeling into the base of the filter for a proper seat on the backing plate.
- 6) Install factory wing bolt on XStream top, then install onto the air filter, snapping into the groove on top of the filter. Tighten factory wing bolt using caution to not overtighten. (Fig. 3, 4 & 5)
- 7) Test the filter for proper fit and seating before riding or installing the seat.

THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.

CLEANING:

K&N Engineering, Inc., suggests checking the air filter element periodically for excessive dirt build-up. Depending on your driving conditions, we recommend cleaning your air filter every 50,000 miles. To clean and re-oil, purchase our filter Recharger® service kit, part number 99-5050 or 99-5000 and follow the easy instructions.
